For Immediate Release

A&N Corporation Renamed to ANCORP

High Vacuum Manufacturer Positioned for New Growth

Williston, FL, September 1, 2017: A&N Corporation, a high and ultra-high vacuum component manufacturer, has updated its corporate identity and become ANCORP.

Under the guidance of new executive management, ANCORP has restructured their organization and begun upgrades to their facility to make way for increased production and sustainable long-term growth.

ANCORP's mission is to *empower transformative science and technology*. "Our rebranding goes beyond a new logo and a name change. It represents a refocus on the team that has helped us get here. It represents a refocus on the mission our company was founded on and a reinvention of the way we serve our customers." said Marketing Manager, Nicholas Wagner.

One of the largest manufacturers in Levy County, ANCORP employs machinists, welders and engineers to produce stainless steel vacuum chambers, flanges, fittings and valves to be shipped to researchers, equipment manufacturers, and industrial users around the world.

The facility upgrade and growth creates more employment opportunities for high-skilled labor in and around Levy County. "One of our goals is to create sustainable, long-term employment for the residents of our community," says VP of Administration, Suzanne Mills. "We want our employees to grow here, learn here, and stay for the long run."

About ANCORP: ANCORP is a manufacturer of high and ultra-high vacuum components located in Williston, FL. Founded in 1965, ANCORP offers an extensive line of vacuum flanges, fittings, valves, chambers and custom fabrications to researchers, equipment manufacturers and industrial users around the world. ANCORP products are designed to meet or exceed the standards required by their customers, such as those involved with thin film deposition, surface analysis, semiconductor devices, cryogenics and the aerospace industry.
